### Acrylic Sealer Satin

Increase your acrylic product life expectancy to 30 years.

#### Description

Acrylic sealer satin is a water-based coating to protect your acrylic model from moisture and make it weatherproof.

#### Processing

Acrylic sealer satin is a concentrated solution of acrylic polymers in water. Before use please shake or stir well.

For proper sealing the surface must be free of wax, oil, dirt or dust. Apply using brush, roller, wiping with a soft cloth or by spraying.

Acrylic Sealer satin can be applied in one or several layers in order to improve the protective properties. Depending on temperature and humidity it can be reapplied after 45 minutes. If several layers are applied you will obtain a more shiny effect.

#### Special instructions

Please only process at temperature between 10 and 30 ° C

The advantages are: one component, solvent-free, water-based, quick drying, easy to apply, good UV resistance, excellent adhesion, protection against absorption of dirt and protection against moisture.

Coverage 12-16 m<sup>2</sup> / Kg

#### Packing

The Acrylic Sealer is available in bottles.

#### Durability

Provided the components are stored in sealed containers in a cool and frost-free place out of direct sunlight, the shelf life is at least 1 year.

#### Safety

When in contact with skin or eyes rinse with plenty of water. When ingested do not induce vomiting. Consult doctor when symptoms persist. Please use protective gloves.

### Characteristics

- satin finish
- More shiny after multiple layers
