

## Characteristics

- Hard Modelling Wax
- Good malleable at bodytemperature
- Does not stick
- not grainy
- Solid

## Wax Modeling Wax Hard

This wax is suitable for the "lost wax".

### Description

Our modeling wax hard has been specifically designed for the arts sector and sculptures. The wax can be perfectly shaped with tools or by hand. The model does not stick and is neither grainy nor greasy. Due to its resilience, the wax is not or hardly deformed during removal or storage.

### Technical specifications

melting point	70 ° C
Ideal processing temperature	30-40 ° C
color	Bronze

### processing

Cut the wax in smaller pieces for easier handling and warming. To knead the wax it is easier to place it in the oven at (maximum) 40 ° C. Optionally, the wax can also be placed under a warm lamp or next to a heat source. Make sure that the temperature during heating is not too high, otherwise the wax may be too soft or even liquid.

### Special\_notes

Avoid overheating the wax over 100 °C as this will degrade the wax.

### packaging

This wax is sold in plates of 1 kg.

### durability

At least 5 years.

### Safety

Avoid skin contact with the molten (liquid) wax. Released gases / smoke particles should not be inhaled.

### requirements
